### DETAILED ACTION

1. This Office Action is in response to the amendment filed on September 07, 2007. Claims 1, 3, 5-7 and 9-13 are amended; claim 2 is cancelled; and none of the claims are newly added. Therefore, claims 1 and 3-13 are currently pending in this application.
2. Applicant's arguments filed on September 07, 2007 have been fully considered but are moot in view of new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 and 3-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. As per claim 1, each register including *one or more bits*, ... wherein said *one or more bits* ... define a register access type for each N processors, where  $N \geq 2$  (emphasis added). So when  $N=2$  (the lowest possible number), how a single bit (*one or more bits*) defining the access protocol can define a register access type for each  $N=2$  processors?

Claims 3-13 are also rejected for the same reason(s) as they also include deficiencies of claim 1.

Corrective action is required, although new matter not supported by the original disclosure may not be introduced.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States:

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka (USPN: 5,408,671).

As per claim 1, Tanaka teaches a system comprising:

- shared system registers (i.e. the combination of R1 and 21, R2 and 22, R3 and 23, and R4 and 24 in Figs. 1 and 2), each register including one or more bits defining an access protocol (i.e. four bits one corresponding to each processors, for example, b11-b14 in 21 in Fig. 1), and one or more bits representing data (i.e. data stored in R1 to R4 in Figs. 1-2); and
- N processors (i.e. processors P1-P4 in Figs. 1-2),  $N \geq 2$ , where n is an integer (i.e. n is 4 in Figs. 1-2), each accessing the shared system registers, wherein said one or more bits defining an access protocol include one or more bits that define register access type for each N processors (i.e. bits in 21-24

define access type for each processors P1-P4; see Fig. 2 and Col. 4, lines 20+).

As per claim 3, Tanaka teaches the claimed invention as described above and furthermore, Tanaka teaches that the access type being selected from a group that includes READ, READ/CLEAR, READ/SET, and READ/WRITE, is inherently embedded in the system taught by the Tanaka prior art because once the register access is given to any one of the four processors, that processor read or write into that register.

#### ***Allowable Subject Matter***

5. Claims 4-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2186

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
